

The Ice Man

FACT: Ice is frozen water. Water turns into ice when the temperature is COLD - below 0 degrees centigrade. Ice turns into water when it is WARM above 0 degrees.

150 years ago, Victoria was Queen of England. There were no fridges and no freezers. It was hard to keep food cold. Ice cream melted.

This man came to London from Switzerland to sell food.

Can you find his name in the Museum?

Fill it in

C _ _ _ _ G _ _ _ _

The ice cream in his shop melted. He had a clever idea. Look at the display. What did he do?

.....
.....

FACT: Norway is a COLD country. There is lots of ice there in winter. England is WARMER. There is less ice here in winter.

The Ice Man

Here are four pictures of the ice. They are in the wrong order. Can you put the right number beside each one?

Picture Number
The ice in Norway is ready to go on the boat.

Picture Number
The men are selling the ice in England from a cart.

Picture Number
The men in Norway are putting the ice on the boat.

Picture Number
The men in Norway are cutting ice from the frozen lake.

The Ice Man

When the ice got to London, Carlo Gatti had to stop it from melting. 150 years ago, he built a warehouse with a deep well to put the ice in. The warehouse is now the museum, and you can see the well. Think of four good words to describe the well, and write them here:

.....

.....

Can you draw a picture of the well with ice in it, and Carlo Gatti standing beside it here?
